

# ★ revolution is possible ★

This is a point in history where the world is dominated by a system of brutal capitalist exploitation. Nothing in this world is safe from it or the U.S. empire, its main enforcer. Things as fundamental as human dignity and the very planet we live on are subservient to the interests of the capitalist class and the endless pursuit of profits.

For so long, so many of us have not stepped out because we believed nothing else was possible. Let's go up against all of that together, and show people these are not the choices, revolution is possible!

**Together, our generation can build an active, radical and unapologetically revolutionary movement.** It's possible to rebel against the system, and show everyone that things don't have to be this way!

**There is much to do.**
